Navigating the Seas of Entrepreneurship

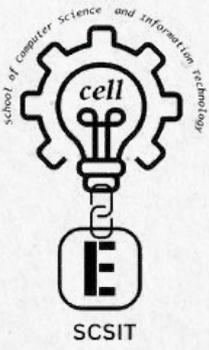

ABOUT E-CELL SCSIT

The Entrepreneurship Cell (E-Cell) of the School of Computer Science & Information Technology, DAVV, is more than just a student body—it is a hub of innovation, creativity, and ambition. Established in 2024, the Cell was founded with a vision to nurture the entrepreneurial mindset within young students and provide them with the right platform to transform ideas into impactful ventures.

At its core, E-Cell is driven by the belief that entrepreneurship is not just about building companies—it is about solving problems, creating value, and leading change. Through mentorship, workshops, startup showcases, hackathons, and collaborations, the Cell strives to equip students with the tools, skills, and confidence to bring their ideas to life.

What makes E-Cell truly unique is its student-led spirit. Every initiative, every event, and every collaboration is powered by the energy and creativity of students who dare to think differently. From representing the institute at prestigious national and global hackathons, to organizing landmark events like TECHVERSE at GENESIS, and supporting the rise of student-led startups, the Cell has already created an ecosystem of growth and innovation within SCSIT.

E-Cell is not just an organization within the college—it is a community. A community where coders, designers, planners, and dreamers come together to collaborate, innovate, and inspire one another. With each passing year, this community grows stronger, expanding its reach and impact while staying true to its vision of turning ideas into reality.

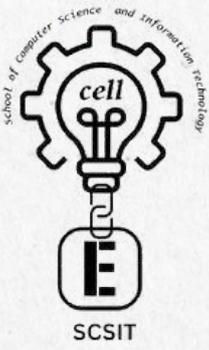

MESSAGE BY THE VICE CHANCELLOR OF THE UNIVERSITY

The main aim and wish is to develop an environment to give the student some spark to be a job giver and not to be a job seeker."

~ Dr. Rakesh Singhai

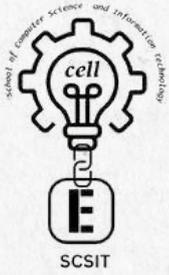

MESSAGE BY OUR HEAD OF DEPARTMENT

We wish all students to achieve their academic excellence with life skills and apply them in real life to transform society and develop an idea into a successful startup. We will always look forward to achieving the heights of accomplishment towards the holistic development of students."

~ Dr. Ugrasen Suman

FOUNDING MEMBERS

E-Cell was founded not as a student club, but as a mindset—a platform for dreamers, doers, and disruptors to challenge norms, driven by passion, purpose, and relentless learning."

"Be The Few, Be The Fearless"

~ **Suraj Karan Singh**

Founding the E-Cell wasn't about starting yet another club, it was about building a launchpad for ideas, innovation, and growth of every member. This community is all about turning big dreams into reality."

~**Harsh Soni**

HOW WE WORK

AT THE ENTREPRENEURSHIP CELL OF SCSIT, WE OPERATE AT THE INTERSECTION OF INNOVATION, COLLABORATION, AND EXECUTION. OUR MISSION IS TO FOSTER A STARTUP CULTURE ON CAMPUS BY ENCOURAGING STUDENTS TO THINK BEYOND CONVENTIONAL CAREER PATHS AND EMBRACE THE ENTREPRENEURIAL MINDSET.

From Ideas to Action

We nurture innovative ideas through regular brainstorming sessions, workshops, and competitions—helping students transform concepts into real-world solutions and startup models.

Collaborative & Flat Structure

Our teams work in a flat, inclusive environment where every member contributes across tech, design, strategy, and marketing—fostering creativity and ownership.

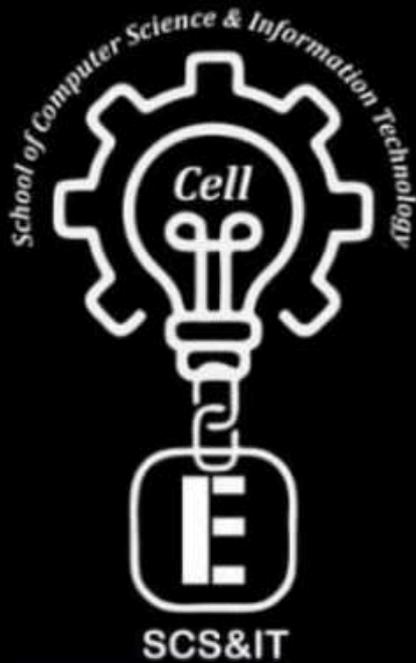

Learning by Doing

Through hands-on experiences like pitch events, mentorship programs, and startup visits, we equip members with practical skills and entrepreneurial confidence.

Connect with the Startup Ecosystem

We bridge students with incubators, industry mentors, and investors—providing the right network and support to take their ideas to the next level.

E-CELL - IGNITING INNOVATION,
ONE IDEA AT A TIME!

EVENTS

Idea Mania

Idea Mania – Showcasing innovation, inspiring entrepreneurship, and shaping future changemakers.”

The E-Cell of SCSIT organized Idea Mania, an Inter College-level flagship event where teams showcased their innovative startup ideas and technical solutions.

The competition witnessed enthusiastic participation from our institute as well as other colleges, fostering a vibrant spirit of creativity and entrepreneurship. Esteemed judges Shantanu Sir and Dr. Shraddha Masih Ma'am graced the event, sharing their insights and inspiring participants with valuable feedback.

No-code Low code Hackathon

Empowering students to innovate through no-code and low-code, driving rapid solutions with creativity and collaboration.

The E-Cell of SCSIT hosted an Indore-level Hackathon, uniting tech enthusiasts from across colleges. Participants were challenged to create functional prototypes using no-code and low-code platforms, promoting rapid and practical solution building.

With a variety of innovative ideas and energetic collaboration, the Hackathon became a true showcase of creativity and the smart use of modern technology.

Kaun Banega Coder (KBC)

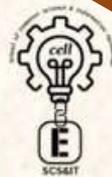

Kaun Banega Coder – a thrilling tech quiz of knowledge, debugging, and speed, showcasing true coding brilliance!"

Kaun Banega Coder, a three-round quiz in Genesis event inspired by Kaun Banega Crorepati. Teams of two competed in Round 1, a 20-question tech quiz; Round 2, a Bug Bounty debugging challenge; and Round 3, a rapid-fire buzzer round.

A special Vercel platform was created to track team progress and participation across rounds, making the event more engaging and transparent. With enthusiastic participation and sharp competition, the event showcased students' technical skills, problem-solving, and quick thinking.

Techcharades

"Tech-Charades: Where technology meets creativity, laughter, and teamwork in a fun guessing game!"

Tech-Charades, hosted by E-Cell SCSIT, was a fun twist on the classic Dumb Charades with a technology theme. Teams competed by acting out tech-related words and phrases, while their partners worked to guess them within the time limit.

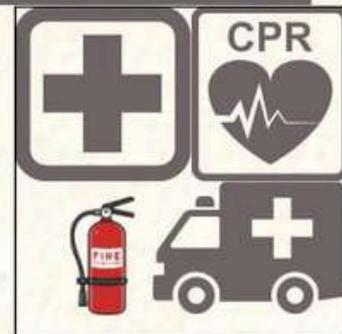

The event was full of energy, laughter, and clever gestures, with the team guessing the most phrases emerging as winners. It perfectly blended fun, learning, and collaboration.

Civil Defence Training program

Civil defence is not just a duty; it is a shared responsibility to protect the fabric of our society".

SCSIT and Joint Bookroom

Civil Defence Training Program at School of Computer Science & Information Technology (SCSIT), DAVV Indore. Officers from Civil Defence conducted a training session for student.

Imparting crucial skills on how to assist in emergencies, perform CPR, and save lives in situations where timely ambulance response isn't possible. A valuable initiative towards building a responsive and responsible community.

MEMEATHON

"Where Tech Meets Laughter"

IT & SOCIAL PROJECTS BY ECELL MEMBERS

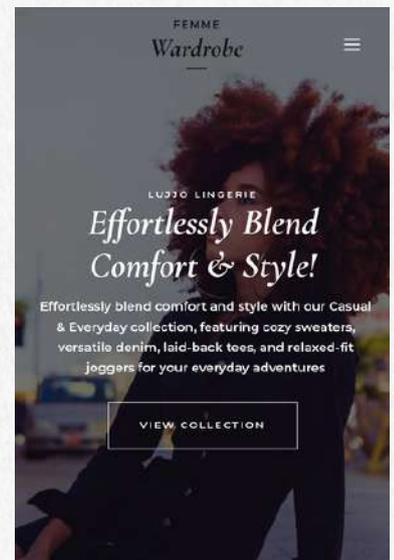

KBC vercel is a dynamic online platform designed to host exciting and competitive quiz events. It provides a seamless experience for users to engage in intellectual battles with their peers. The website is perfectly suited for college quiz competitions, tech fests, and corporate team-building events. Event name- kaun banega coder
Designed by - Gourav patidar

Fully fledged Ecommerce website

A dynamic e-commerce website for a startup using WordPress. This online store features a secure payment system, a responsive design for all devices, and an easy-to-use interface, helping the business launch and grow effectively.

Company - lujjolingerie
Designed by - Abhay rai

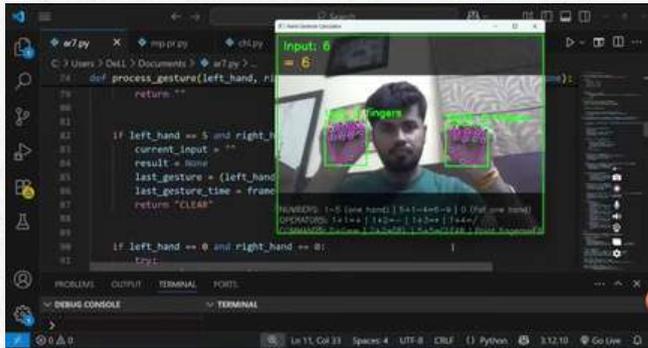

Finwise

A personal finance and investment management tool that helps users track expenses, analyze spending patterns, and make smarter financial decisions. It combines budgeting, goal setting, and investment insights into a simple, user-friendly dashboard.

Designed by - Aniruddh Gupta

IT & SOCIAL PROJECTS BY ECELL MEMBERS

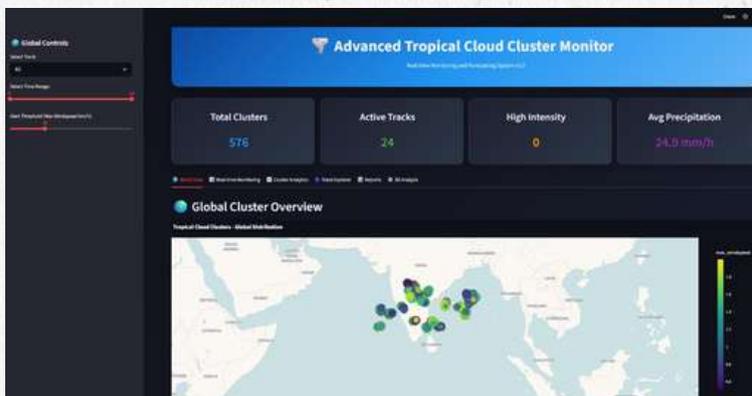

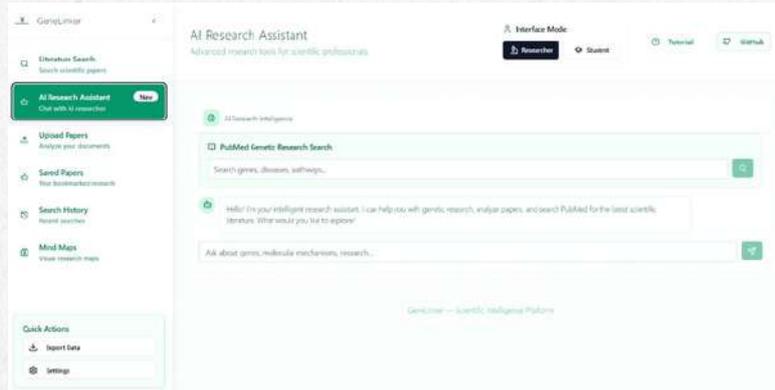

A **hand gesture-based calculator** that lets you perform basic arithmetic operations using just your fingers—no buttons, no touchscreens
Designed by - Abhaya Rai & Gourav Patidar

GeneLinker

A pre-medic research project that analyzes biomedical data and generates detailed insights with structured visualizations like mind maps. It's designed to assist researchers and students in understanding complex genetic and medical relationships.

Designed by - Aniruddh Gupta

Tropical Cloud Cluster

This project uses machine learning to detect and forecast tropical cloud clusters. The system helps in early identification of storm formations and impact analysis, supporting better disaster preparedness and weather forecasting.

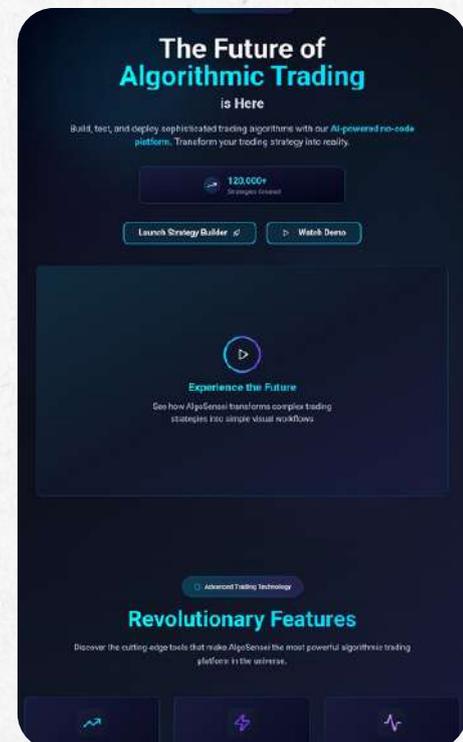

Designed by - Aniruddh Gupta

IT & SOCIAL PROJECTS BY ECELL MEMBERS

Algo Sensi

Algo Sense generally refers to a system, tool, or platform that uses algorithms to make sense of complex data. It's often used in fields like trading, finance, AI, or analytics to provide insights, predictions, or automated decision-making.

Designed by - Divya Nagar and Aniruddh Gupta

Debatrix

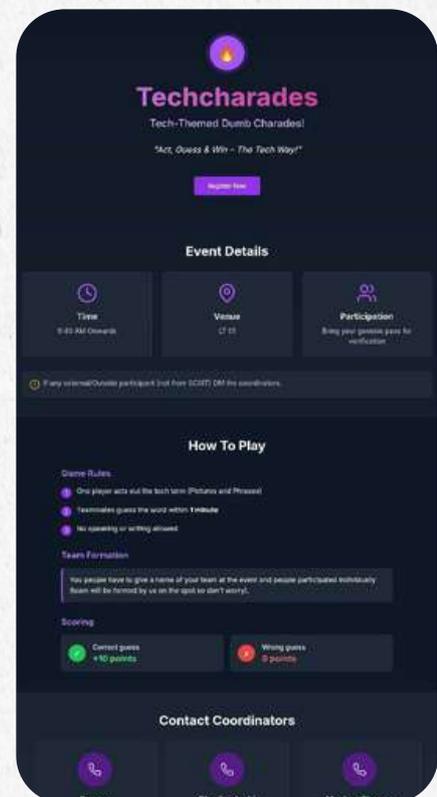

The Impressive Debate Learning Platform Powered by Ai to elevate your skill, compete and master the art of arguments.

Designed by - Gourav Patidar

Techcharades

TechCharades Host Kit, designed to empower any college, university, or tech organization to host their own competition. This system streamlines the entire event lifecycle, from registration to scoring, turning a simple game into a professional and highly engaging experience. Participants can register directly through a centralized web portal, which is a major enhancement, as it allows for an automated and smooth sign-up process.

DComm: Harnessing Creativity, Building Brands

When opportunity knocks, the ready don't just listen—they build a door. That is the spirit behind DComm, a dynamic communications agency that emerged in early 2025 when two visionaries, Himanshu and Kapil, decided not just to observe the digital marketing landscape—but to shape it.

The Genesis

Both Himanshu and Kapil came to the table with prior experience in marketing, advertising, or related creative fields. Having worked with diverse clients and seen the gaps, inefficiencies, and unrealised potential in how brands communicate, they saw an opening. With complementary skills, bold ideas, and shared ambition, they founded DComm, aiming to offer a fresh, intelligent, client-centred approach to digital communication and branding.

What DComm Does

From strategy to execution, DComm provides a full range of services designed to help brands stand out and stay relevant. While still a young agency, DComm has already served 30+ clients, cutting across industries, each with its own challenges and aspirations. Whether it's crafting social media campaigns, designing brand identity, producing content, or consulting on communication strategy—DComm adapts to each partner's needs with creativity and care.

People & Presence

DComm operates with a lean but capable team of 18 members, bringing together diverse talents—designers, content creators, social media experts, strategists, project managers—all working in sync. The agency has a dual presence in Delhi and Indore, enabling both metropolitan reach and deeper regional insights. This geographic spread helps DComm stay grounded, understanding both urban trends and emerging markets.

Why DComm Matters

Client-first mindset: DComm doesn't just deliver; it listens, analyses, and evolves with each client.

Fresh perspective: Because it's new, the agency is not bound by inertia or outdated systems. Innovation is baked in.

Scalable creativity: Even while handling many clients, DComm ensures that each project gets the attention and originality it deserves.

Local & global awareness: Being rooted in Indore and Delhi gives DComm the benefit of local sensibilities; its aspirations and standards are global.

Looking Ahead

In this fast-shifting landscape of digital trends, stories go viral overnight, and brand reputations can rise—or tumble—fast. Himanshu, Kapil, and the DComm team see immense room for growth: deeper content innovation, stronger use of analytics, weaving in emerging technologies, and expanding their client base without losing the personal touch that sets them apart.

VVD

At VVD Live, we believe education should reach every child—regardless of where they come from or what their financial background is. Our mission is simple yet powerful: no child should be left behind in learning.

We are building a platform that empowers teachers to expand beyond their classrooms and connect with students everywhere. VVD takes care of everything outside teaching—live classes, study materials, student engagement, and coaching management—so educators can focus on what they do best: teaching and inspiring young minds.

Every teacher has a story. Every student has a dream. VVD is the bridge that connects the two.

What started as a vision is now becoming a movement—bringing together teachers, students, and technology under one roof. With innovation at our core and compassion in our hearts, we are shaping the future of education.

This is not just about online learning. It's about creating opportunities, breaking barriers, and lighting the path for the next generation of learners.

VVD aims to transform education by supporting teachers with marketing, equipment, and branding while connecting them with students for enhanced learning experiences.

Founder : Abhinav Jain

SAFAR SAARTHI

Vision

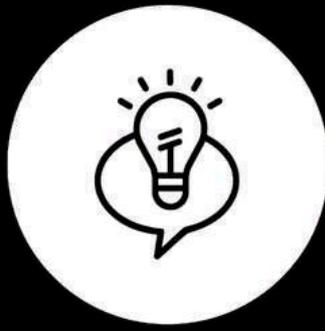

Safar Saarthi MP is an MP-first travel platform that fixes the core friction in domestic travel: information that's inaccurate, scattered, or incomplete. We unify “how to reach, when to go, what to explore, what to eat/buy” into one trusted, bilingual (HI/EN) source so people can plan right, book fair, and travel like a local. The platform is built to strengthen local livelihoods—hotels, autos/taxis, and student guides—so the travel economy is fair and inclusive.

What we offer

A single window for place intelligence (seasonality, routes, budgets, itineraries, local specialties) plus low-cost, transparent bookings: hotels at consistently better net prices, direct or pay-at-hotel settlement options, and affordable, verified local guides (including students). Travelers get an itinerary builder, offline access, and clear do's/don'ts; partners get simple onboarding, low commissions, reviews, KYC verification, and tools for inventory/rates or ride packages. Autos/taxis receive online demand with minimal fees; properties and guides earn more, with fair ranking and dispute resolution.

Mission

To make Madhya Pradesh the easiest state to plan and experience—accurately, affordably, and safely—while growing local incomes. We will prioritize information quality, fair economics (low commissions, faster/cleaner payouts), youth employment via student guides, and trust-by-design (KYC, verified badges, transparent policies). Safar Saarthi MP is in development, engaging hotels and creators, with a public demo at: <https://surajkaransingh.github.io/travelsaarthi.mp/>
Future : will expand to the rest of the state .

VISION

————— Create | Innovate | Passion —————

Vision : Empowering Futures Through Cutting-Edge Tech Education & Opportunities

Vision is your premier platform dedicated to bridging the gap between academic learning and real-world industry demands for both working professionals and students. We understand that in today's rapidly evolving technological landscape, continuous skill enhancement and practical experience are paramount.

What We Offer:

Comprehensive Technology Education: Elevate your expertise with our diverse range of computer science and IT courses. Whether you're a student aiming for foundational knowledge or a professional looking to specialize, our programs, including B.Tech (Computer Science), M.Tech (Software Engineering), and MCA (Master of Computer Applications), are designed to provide in-depth, cutting-edge knowledge.

Transformative Internships: Gain invaluable hands-on experience through our facilitated internships with leading tech giants like Microsoft (Software Development), Google (Data Science), and Amazon (Web Development). Work on real projects, learn from industry experts, and build a powerful resume that stands out.

Exclusive Industry Events: Network with thought leaders, discover new career paths, and stay ahead of industry trends through our exclusive events. These gatherings provide unparalleled opportunities to connect with professionals and open doors to future career prospects.

Our Mission:

At Vision, our mission is to cultivate a community of highly skilled, adaptable, and innovative individuals ready to thrive in the global technology sector. We are committed to providing the resources, education, and connections necessary to transform aspirations into achievements.

Join Vision and empower your future today.

Founder : Sourav Kumar

Curezy

Curezy – AI-Powered Healthcare Platform

Aim

Curezy aims to make healthcare accessible, affordable, and paperless by using AI-driven solutions for symptom analysis, quick doctor booking, emergency ambulance access, lab test scheduling, and medicine delivery.

Vision

Our vision is to redefine healthcare globally by creating an intelligent, unified platform that eliminates delays, reduces errors, and connects patients, doctors, labs, and pharmacies in one ecosystem. Curezy strives to build a future-ready healthcare system that is smarter, faster, and patient-centric, leveraging AI-powered custom LLM models.

What We Do

AI Symptom Diagnosis – A custom-built LLM analyzes symptoms and provides possible conditions, guiding patients to the right doctor or test.

- Doctor Booking – Patients can instantly book nearby verified doctors through the platform.
- Quick Medicine Commerce – Order medicines online; if unavailable, Curezy suggests doctor-verified alternatives.
- Smart Ambulance Booking – One-tap booking of ambulances from nearby hospitals in real-time.
- Lab Test Scheduling – Patients can schedule lab tests with verified partners and get digital reports.
- Paperless Healthcare – All medical records, prescriptions, and test results are securely stored under a single patient ID.
- Revenue Model – Commission from doctor consultations, labs, medicine sales, and API integrations.

Curezy is building the next-generation healthcare platform, ensuring seamless, reliable, and intelligent healthcare delivery to every user.

Co-Founder : Dharika Joshi

DNP Studio – Designing & Storytelling That Moves People
Bold visuals. Honest stories. Lasting impact.

At DNP Studio, design is more than decoration—it's narrative. We blend sharp graphic design with authentic storytelling to help brands, founders, and creators express their purpose. Whether it's a startup launch or a heritage brand refresh, we craft visuals that speak, not just look good.

Core Services

Brand Identity & Logos – Purpose-driven branding that's instantly recognizable.

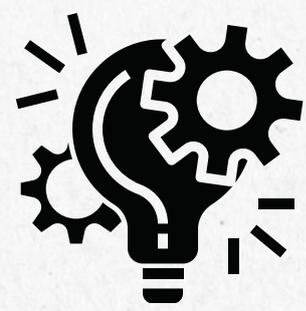

Documentary-Style Storytelling – Short films, brand stories, and founder journeys.

Marketing Collateral – Posters, packaging, and social-media graphics.

Editorial & Magazine Design – Layouts that turn readers into fans.

How We Work

1. Discovery Session – A collaborative call to understand your brand goals and audience.
2. Deep Research – We study your industry, competitors, and narrative hooks.
3. Concept & Moodboards – Visual direction + storytelling framework.
4. Design & Production – From first draft to final cut, you see every milestone.

UPCOMING PROJECTS & EVENTS

College_clockin(App launch)

A comprehensive college solution. Take attendance with a single group selfie, simplifying the process for professors and students. The app also features a dedicated space for project management, helping teams collaborate, submit work, and stay organized.
